• GPOSpeedPump (Goodspeed Automatic Fuel Pump)

Concerning

We (Lisias and zer0kerbal) absolutely love this add-on and really want others to

adopt / release the above named wonderful add-on.

Hopefully we hear back from you with an answer, but in case we don't hear back from you we intend to respectfully proceed as soon as the beginning of April 2022, as permitted by the license of this add-on.

enjoy it as well, so we are asking for your permission to update / continue /

We are asking for express permission to use the assets, code, copyrights, and trademarks for this add-on.

Recognition of original authors/maintainers is always provided and contributions

always welcomed; we will gladly step aside for you should you ever want to continue this add-on yourself; which includes transferring back ownership of the CurseForge listing and any granted use rights including but not limited to ™

trademarks and © copyrights. In the interest of continuity for the players, we are asking a Couple of requests:. • to have both Lisias and zer0Kerbal be added to the SpaceDock

'Authors' (links provided below) so we can update / release using the same listing. Using the same listing will benefit the

> players and avoid confusion. • To have the ownership of the CurseForge listing transferred to Lisias(lisiast on CurseForge), who will keep current author(s) membership as authors; and add zer0Kerbal (links provided

below) so we can update / release using the same listing.

Using the same listing will benefit the players and avoid confusion. If you cannot access your account, kindly submit a help ticket to CurseForge/OverWolf support referencing zer0kerbal and adoption, and then please send us the ticket number. • A posting on the related KSP forum thread(s) (links provided below) would be swell along with a public posting in the addon's thread tagging and telling @HebaruSanand @DasSkelett

about this adoption so **CKAN** will be smoothly updated. Kindly

also comment to the moderators to close the thread once the

• Permission to post this communication in a public space, specifically in the corresponding GitHub repo for the purpose of legal transparency. Once new threads have been created, we will post a link to it in the existing

GPOSpeedPump GitHub R ▼ CurseForge List

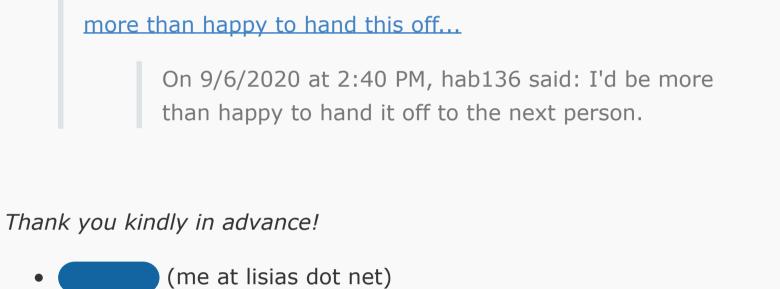

threads; and suggest at that time to close the existing threads by posting a

Forum Thread II Original Forum Thread

- Author(s):
- Replied: April 5 The license is GPL3 and there are no art assets, so the license already grants you legal permission to

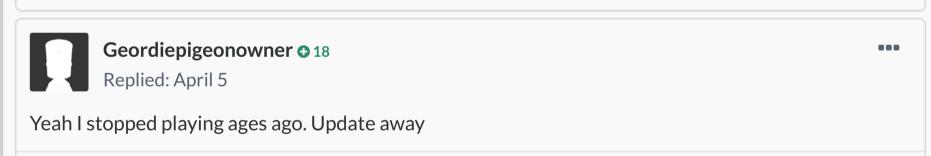

continue it. AFAIK there's no trademark on the name.

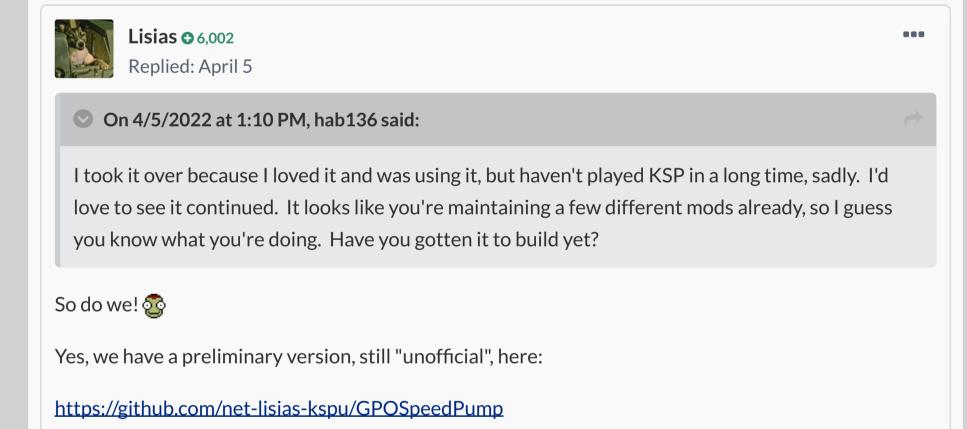

what you're doing. Have you gotten it to build yet?

I've updated the SpaceDock and Curse pages. Let me know when you've got a forum thread up and I'll update the existing forum page. We'll also need to update https://github.com/KSP- CKAN/NetKAN/blob/master/NetKAN/Goodspeed.netkan.

I took it over because I loved it and was using it, but haven't played KSP in a long time, sadly. I'd love to

see it continued. It looks like you're maintaining a few different mods already, so I guess you know

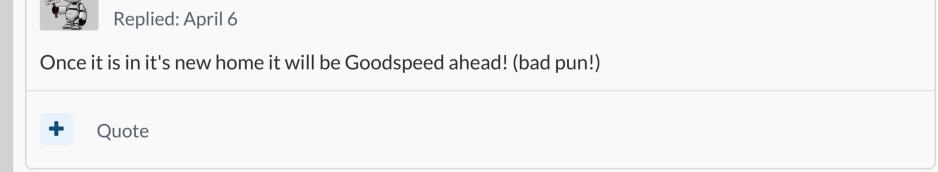

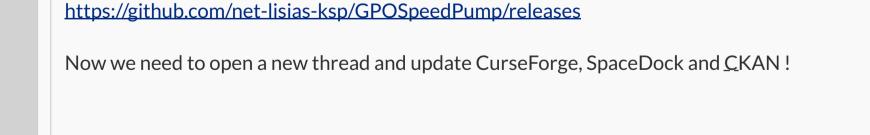

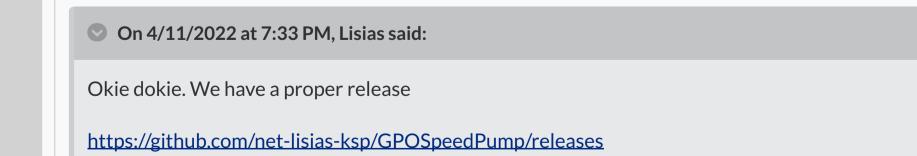

By the end of the week, it will be moved to a proper "organization", where we will make it a "official

product". 🚳 (anything on that KSPU stunt is for experimental thingies - some works, some don't.... 🚳)

(and, yeah, it is working on every KSP version from 1.3.1 to 1.12.3!!

Now we need to open a new thread and update CurseForge, SpaceDock and CKAN!

Try now, this one is fine (as far as I know.. hehe). I'm giving him a test run on 1.12.3 - I had tested it successfully on 1.3.1, and I will give it a smoke test on 1.12.3 and 1.7.3 tonight.

I borked on a stupid detail (as usual 🚳) and redid the whole release.

If it runs on 1.3.1, 1.7.3 and 1.12.3, it will run on any KSP version from 1.3.1 and up. (and note the on the name! (26)
