Description   Files   Images   Relations

This mod lets you assign "pump levels" to fuel tanks (and more!). Higher-level fuel tanks will flow automatically to lower-level tanks. Equal-level tanks can be set to balance automatically.

See the **forum thread** for more details.

Hi,
Do you think you'll be able to make a version of your addon for 1.10 ?
I'm looking for an easy way to refuel my tanks when docking my station, and it seems your addon is doing the job quite well :)
Thank you
